Medicine

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas. Our great strength is in the clinical brain sciences, covering psychiatry, clinical psychology, neuropsychology and neurology. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, where we partner with the Royal College of Obstetricians and Gynaecologists, anaesthesia and critical care, emergency medicine and pathology.

Our emphasis is on publishing books for the widest team of healthcare professionals in their day-to-day practice and to support their higher specialist training, revalidation and examination requirements.

The medical book programme is complemented by a strong list of journals in mental health, supported by other titles in areas such as neuropsychology, disaster medicine and reproductive medicine.
