Abstract
Background—Abnormalities on magnetic resonance imaging scans are common both before and after surgery for congenital heart disease in early infancy. The aim of this study was to prospectively investigate the nature, timing, and consequences of brain injury on magnetic resonance imaging in a cohort of young infants undergoing surgery for congenital heart disease both with and without cardiopulmonary bypass.
Methods and Results—A total of 153 infants undergoing surgery for congenital heart disease at <8 weeks of age underwent serial magnetic resonance imaging scans before and after surgery and at 3 months of age, as well as

• My Workspace organizes all the user's research materials in a convenient area

• Easily access projects, eTOCs and Saved Searches/Alerts

• My Projects allows for quick, easy access to and organization of multiple projects within OvidSP

Transforming research into results

The screenshot displays the OvidSP interface. At the top, there are navigation tabs for Journals, Books, My Workspace, Nursing@Ovid, OvidMD, EBP Tools, and External Links. Below this, there are search and project management options. The main area shows a project titled 'Crohn's Disease' with 3 items. An 'Attach Item(s) to Project' dialog box is open, prompting the user to browse for a file. A callout box with a blue arrow points to the dialog, containing the text: 'Upload a file from your desktop'.

The Ovid Toolbar

The screenshot shows a Windows Internet Explorer browser window displaying a PubMed article. The address bar shows the URL: <http://www.ncbi.nlm.nih.gov/pubmed/23463537>. The browser's menu bar includes File, Edit, View, Favorites, Tools, and Help. The Ovid toolbar is visible in the top-left corner, with a blue box highlighting it and a blue arrow pointing to the right. The toolbar contains icons for Wolters Kluwer Health, Ovid, and Add To My Projects. The main content area displays the article details for 'The impact of postoperative infliximab maintenance therapy on preventing the surgical recurrence of Crohn's disease: a single-center paired case-control study' by Araki T, Uchida K, Okita Y, Fujikawa H, Inoue M, Ohi M, Tanaka K, Inoue Y, Mohri Y, Kusunoki M. The article includes sections for Abstract, PURPOSE, METHODS, RESULTS, and CONCLUSION. The PubMed ID (PMID) is 23463537.

- Our new, exclusive browser-based Ovid Toolbar allows users to add external resources easily to a project within OvidSP

My Projects

- Combine all external results in single Universal Search tab
- Hide duplicate results
- Add results to My Projects

Ovid Universal Search™ & Ovid Toolbar

- Our unique add-on cross-platform search solution is even more powerful when combined with the Ovid Toolbar
- Users can do more and save valuable research time working within the OvidSP environment
 - Save citations, full text links, and images retrieved from non-Ovid sources into a My Projects folder

The screenshot displays the OvidSP interface with three search tabs: 'OvidSP info. (25 Results)', 'Other Research (50 Results)', and 'Journals (25 Results)'. The 'Other Research' tab is active, showing a search result for 'The prevalence and correlates of meeting the current physical activity for health guidelines in older people: A cross-sectional study in Brazilian women.' The result includes the authors (Vagetti, Gislaine Cristina; Barbosa Filho, Valter Cordeiro; Moreira, Natália Boneti; de Oliveira, Valdomiro; Mazzardo, Oldemar; de Campos, Wagner) and the journal citation (Archives of Gerontology & Geriatrics, 56(3), 9p., p492-500, 2013-05-01). A blue arrow points from the 'journal article, research' link in the search results to a 'My Projects' folder in the 'Manage Projects' section. The 'My Projects' section shows a table with one project named 'Hypertension' containing 1 item, last modified on 2013-Mar-08. Below this, there is an 'Empty Trash now' section with a message that items in the trash will be automatically deleted after 30 days. The 'Hypertension' project details show the same search result as in the 'Other Research' tab, with options for 'Persistent URL', 'Source URL', and 'Complete Reference'.

Search the way you want

- OvidSP Customizations

The screenshot displays the OvidSP search interface. At the top, there is a navigation bar with tabs: Search, Journals, Books, My Workspace, Nursing@Ovid, OvidMD, EBP Tools, and External Links. Below this, a panel titled "Select Resource(s) to search:" contains two main sections: "My Resource Groups" and "All Resources".

My Resource Groups: This section includes a "New Group" button and a "Delete" button. It lists a group named "Jen's Psychology Group" which contains several sub-resources: "PsycARTICLES Full Text", "PsycBOOKS 1806 to February 2013", "PsycCRITIQUES 1956 to February 2013 Week 3", "PsycEXTRA 1908 to February 25, 2013", and "PsycINFO 2002 to February Week 4 2013".

All Resources: This section is divided into "All" and a list of individual resources. The "All" section includes "Adis Journals@Ovid", "Books@Ovid March 05, 2013", "Journals@Ovid Full Text March 06, 2013", "Your Journals@Ovid", "LWW Journals@Ovid", and "PsycARTICLES Full Text". The list of resources includes "Ovid MEDLINE(R) 2009 to February Week 3 2013", "EBM Reviews - ACP Journal Club 1991 to February 2013", "EBM Reviews - Cochrane Central Register of Controlled Trials February 2013", "EBM Reviews - Cochrane Database of Systematic Reviews 2005 to January 2013", "EBM Reviews - Database of Abstracts of Reviews of Effects 1st Quarter 2013", "EBM Reviews Full Text - Cochrane DSR, ACP Journal Club, and DARE", "All EBM Reviews - Cochrane DSR, ACP Journal Club, DARE, CCTR, CMR, HTA, and NHSEED", "ATLA Religion Database 1949 to November 2012", and "Commentaries/Clinical Updates".

At the bottom right of the "All Resources" section, there is a "Select Resource(s)" button.

- Group your resources by research area
- Create fulltext databases of ONLY subscribed content
- Order the resources in customized order

OvidOpenAccess

What is Open Access?

- Freely available, unrestricted online access to peer-reviewed, scholarly journal articles
- Gold Open Access - published within an Open Access journal, which provides all of its articles as Open Access
 - E.g. Medknow, BioMed Central
- Green Open Access - Published articles are archived in a repository or on an Open Access website
 - E.g. PubMed Central
- *The purpose of Open Access is to take full advantage of technology to widen distribution and reduce costs*

OvidOpenAccess Benefits

- Compliment library's breadth of content with regional, hard to find, trusted content
- Cost-effective way of being up-to date with emerging health content
- Provide unrestricted access to evidence-based practice literature, a must have resource, for your clinicians
- OA content provides library with a transcultural perspective to enhance research, increasing awareness of research being done globally
- Facilitate cross-boundary research for students and faculty

- Type-ahead searching

OvidMD - Bringing Research into Practice

The screenshot shows the OvidMD search results page for the query "Crohn Disease + Amyloidosis". The page features a search bar at the top with the query entered and a "Search" button. Below the search bar, there are navigation options for "Calculators" and "PPT Template". The search results are displayed in a list format, with the top results highlighted in a grey box. The top results include:

- Causes and diagnosis of secondary (AA) amyloidosis and relation to rheumatic diseases** (UpToDate®)
- Treatment of secondary (AA) amyloidosis** (UpToDate®)
- Gastrointestinal amyloidosis** (UpToDate®)
- Clinical manifestations, diagnosis and prognosis of Crohn's disease in adults** (UpToDate®)
- Renal amyloidosis** (UpToDate®)

Below these top results, there is a section for "View All UpToDate® Results" and a list of search results, including one for "Infliximab in the treatment of amyloidosis secondary to Crohn's disease" by Cabezuolo, Juan B; Egea, Juan P; Ramos, Fernanda; et al. The page also includes a sidebar with navigation options like "Everything", "Full Text Journal Articles", "Ovid MEDLINE®", "UpToDate®", "Reference Books", "Patient Information", and "Images".

• Easy-to-use Content Filters

• Improved UpToDate results

OvidMD - Bringing Research into Practice

The screenshot displays the OvidMD interface. At the top left is the Wolters Kluwer Health logo. The search bar contains the text "Crohn Disease + Amyloidosis" and a "Search" button. To the right of the search bar are links for "Calculators" and "PPT Template". The main content area is titled "Amyloidosis" by Tara J. Rizvi MD. It includes a "Basics" section with a "Description" and a list of bullet points. On the left side, there is a "Book Contents" section with a tree view showing "Front of Book" and "Table of Contents". On the right side, there is a "Chapter Tools" section with links for "Email", "Print", and "Export to Bibliographic Manager".

Amyloidosis
Tara J. Rizvi MD

Basics

Description

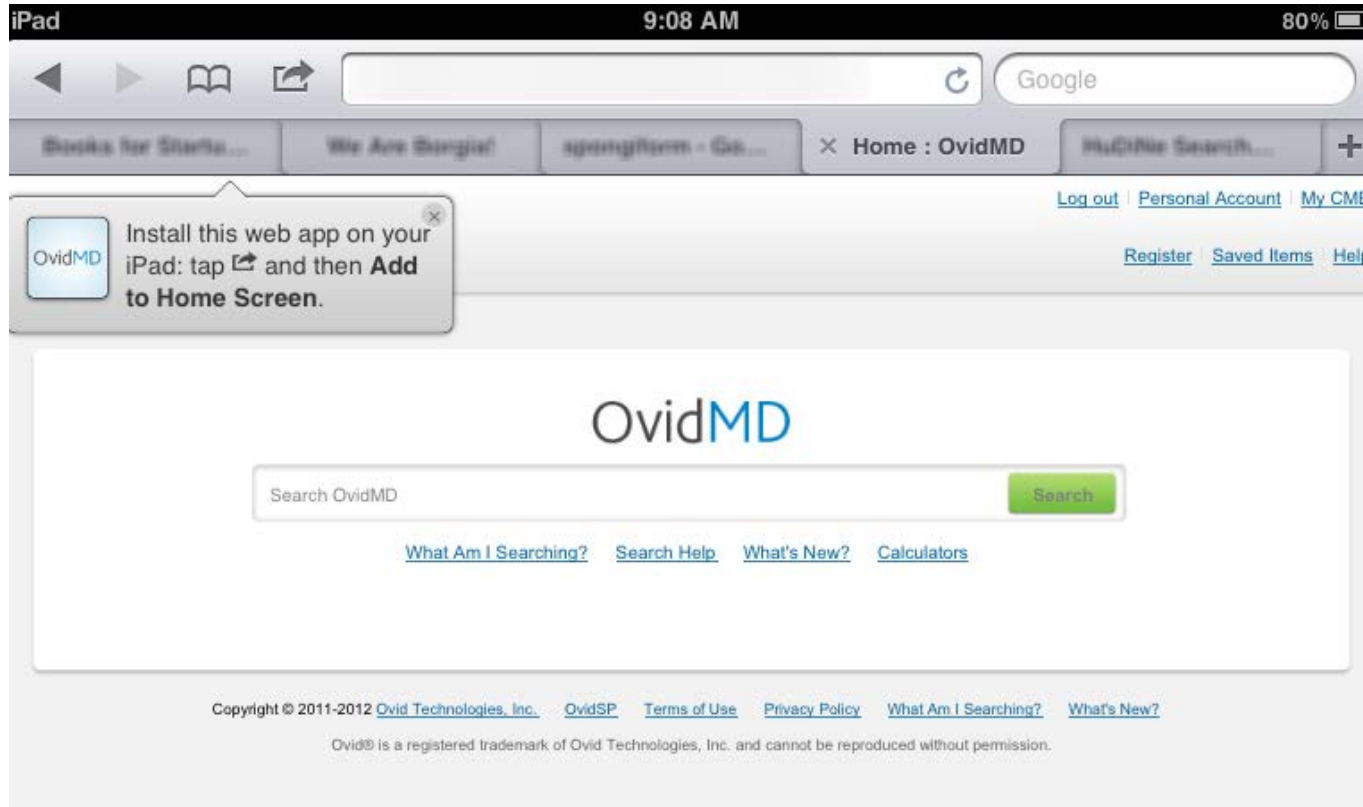

- A group of diseases characterized by extracellular deposition of insoluble protein fibrils in organs and tissues
- Classification is based on the nature of precursor plasma proteins that form fibril deposits (1):
 - Primary (AL): Plasma cell dyscrasia; deposition of protein derived from immunoglobulin light chain fragments
 - Secondary or reactive (AA): Complicates chronic infections or inflammatory diseases; deposition of serum amyloid A(SAA) protein
 - Heritable or familial (AF): Many different types of variant plasma proteins form amyloid deposits beginning in midlife; most common form is caused by mutations of transthyretin (ATTR)
 - Dialysis-related: Deposition of fibrils derived from β_2 -microglobulin; predilection for osteoarticular structures
 - Senile systemic amyloidosis: Deposition of otherwise normal (wild-type) transthyretin in myocardium and other sites seen in elderly
 - Organ-specific amyloidosis: Deposition isolated to 1 organ, resulting in specific syndromes; most common is Alzheimer disease caused by cerebral amyloid plaques:
 - Localized amyloidosis: Results from local amyloid deposits in tracheobronchial tree, urinary tract, or skin, which are also derived from monoclonal light chains, but not due to underlying systemic plasma cell disorder
