文摘 The Isothermal Melting (ITM) Process was developed as a revolutionary aluminum-melting **alternative** to natural-gas-fired reverberatory furnaces that offers more than 70% **energy** savings. The principles of ITM development - based on significant increases in watt density and electrical-**energy** conversion efficiency - can have broad crosscutting applications.

The calls may also include specific terms that apply to the call such as further technical details, cut-off date for proposal submission, and any pertinent clauses such as available GFP or specific Organizational Conflict of Interest requirements. Proposals or White Papers can be submitted at any time or in response to calls. Late bid and proposal provisions (IAW FAR 52.215-1 (c)(3)) will apply to this BAA.

Amount \$1

Upper Amount \$50,000,000

Amount Note USAFA anticipates the award of grants, cooperative agreements, or contracts under this BAA. It is anticipated cumulative annual awards will not exceed \$50 million. The amount of resources made available to this BAA will depend on the quality of the proposals received and the availability of funds. Awards may start any time during the fiscal year.

Eligibility All responsible, potential applicants from academia and industry are eligible to submit proposals. Small businesses are encouraged to propose on all of the solicitations. The NAICS code, unless otherwise stated in the BAA amendments shall be 541711, Research and Development in Biotechnology and 541712, Research and Development in the Physical, Engineering and Life Sciences (except Biotechnology). The size standard for both NAICS codes is 500 employees. USAFA particularly encourages proposals from small businesses, historically black colleges and universities, minority institutions, and minority researchers. However, no portion of this BAA is set aside for a specific group.

Abstract USAFA's Dean of Faculty (DF) is announcing to business and academia the intent to solicit proposals for basic and applied research through this BAA. This strategy provides USAFA DF an acquisition tool with the flexibility to solicit proposals and make awards to develop technologies to meet present and future Air Force research needs as technology issues are identified. USAFA invites proposals for research in many broad areas.

The Air Force Academy invests in an active research program for three main reasons. First and foremost, research significantly enhances the cadet learning experience. USAFA's research is done by, for, and with cadets who work alongside fellow cadets and faculty mentors. Research provides cadets with rich independent learning opportunities as they tackle ill-defined problems and are challenged to apply their knowledge and abilities. Secondly, USAFA's research program provides opportunities for essential faculty development. Research broadens and deepens the experience base of the faculty. This infuses current, relevant, state-of-the-art and cutting-edge applications and examples into the curriculum. This also helps our faculty remain current in their respective fields. Third, USAFA strives to conduct research to enhance the ability of the Air Force to perform its mission. There are currently ongoing research projects spanning topics as diverse as super cooled cesium atoms, cyber security, spatial disorientation, and homeland defense.

ARCTIC EXPEDITION UNDER SIR JOHN FRANKLIN. 127

No. 11 (D.)

COPY of a LETTER from Dr. *M'Cormick* to the Secretary of the Admiralty.

11, Apsley Cottages, Twickenham Green,
20 February 1850.

Sir,
I BEG leave to transmit herewith, for the approval of my Lords Commissioners of the Admiralty, a list of the crew, gear and provisions and clothing requisite for the equipment of the Boat Expedition, which I have volunteered to conduct in search of Her Majesty's ships "Erebus" and "Terror," under the command of Captain Sir John Franklin.

The boat I should prefer for this service would be one similar, in the materials of its construction, to the boat used by Sir Edward Parry, in his attempt to reach the North Pole in the year 1827; but this I must leave to the superior judgment

No. 11.
Dr. M'Cormick's
Plan for a Boat
Expedition.
