4 CHINA AND THE WEST

Notions of diaspora, orientalism, exoticism, imperialism, postcolonialism, and multiculturalism have been employed to cast light on issues pertinent to Chinese American music. Recently, scholars have published books and articles with subjects ranging from the traditions of Chinese music in Chinatowns<sup>18</sup> to the role of Chinese culture in American avant-garde music<sup>17</sup> and American society,<sup>16</sup> the stereotypical/orientalist portrayal and representation of Chineseness on stage and screen,<sup>19</sup> and the perception and reception of Chinese American musicians' performances.<sup>20</sup>

Two monographs devoted to intercultural music studies possess special relevance for the present volume. The interdisciplinary study *Locating East Asia in Western Art Music* (2004) takes a holistic view of East-West musical relations in its exploration of both Asian-influenced Western composers and Western-influenced Asian composers as agents of cultural exchange.<sup>21</sup> Issues of intercultural dialogue through music are the focus of *West Meets East: Musik im Interkulturellen Dialog*.<sup>22</sup>

In addition to these monographs, several Chinese composers of contemporary music have gained the attention of a number of musicologists and theorists, paving the way for portions of the present volume.<sup>23</sup> A number of recent publications have been devoted to various aspects of contemporary Chinese music, testifying to increasing interest on the part of Western scholars.<sup>24</sup> Thus far, however, the present volume is the only one devoted to Sino-Western musical encounters.

There is no denying a Chinese-Western divide in the encounters discussed in this volume. It is foregrounded in sights, sounds, and composition conceptions as well as popular and critical reception. But the notion of such a divide can also be contested. The organ and symphony orchestra, brought to China and discussed in the essays by Urrows and myself, were welcomed by local Chinese. Both have become parts of China's musical culture, which showcases cultural synergy rather than opposition. The portrayal and representation of Chinese themes on the Western stage have long evinced orientalism and stereotyping, but they can also be understood as celebrating multiculturalism; Canadian composer CHAN Ka Nin's opera *Iron Road*, discussed by Ingraham, is a case in point. The hybrid sonorities of Western orchestras showcasing Chinese instrumentation, as discussed in Winzenburg's essay, are not only examples of musical-cultural mixing; for many Chinese, then as well as now, they are icons of national glory, one of many ways of asserting national identity and recognition in a world of unequal political, economic, and cultural Chinese-Western relations.
