

# FREEMIUM OPEN ACCESS THE OECD MODEL

Presentation at CALIS/DRAA  
May 2015

# About the OECD

---

## Mission:

- to promote policies that will improve the economic and social well-being of people around the world;
- provide a forum in which governments can work together to share experiences and seek solutions to common problems.
- measure, analyse, compare data, and set standards to predict future trends on a wide range of things.
- recommend policies designed to make the lives of ordinary people better.

# OECD researches various area

---

Agriculture and fisheries

Chemical safety and biosafety

Corporate governance

Economy

Environment

Green growth and sustainable development

Health

Innovation

International migration

Investment

Regional, rural and urban development

Regulatory reform

Social and welfare issues

Education

Finance

Industry and entrepreneurship

Insurance and pensions

Public governance

Science and technology

Bribery and corruption

Competition

Development

Employment

Internet

Tax

Trade

# Current OECD initiated topics

---

- PISA:
  - Evaluate education systems worldwide by testing the skills and knowledge of 15-year-old students
- Base Erosion and Profit Shifting:
  - G20 initiated project to understand the extent of large MNCs avoiding tax and to address the issue
- Inequality and the Middle Income Trap:
  - Fragmentation of Society, the Rich getting Richer, the Poor receives help, but the Middle Income faces increasing stress to maintain and improve their lifestyles

# About OECD iLibrary

---

- OECD iLibrary:
  - Repository for all OECD output across all Directorates
  - Increase usage for OECD content via increased visibility and improved usability
- •9 670 ebook titles
- •39 200 chapters
- •85 400 tables and graphs
- •4 000 articles
- •4 000 multilingual summaries
- •4 360 working papers
- •3 640 key tables
- •5 billion data points across 42 databases

# Directives and Directions

---

## **Council**

Oversight and  
Strategic Direction

## **Committees**

Discussion, Monitoring  
and  
Peer Review

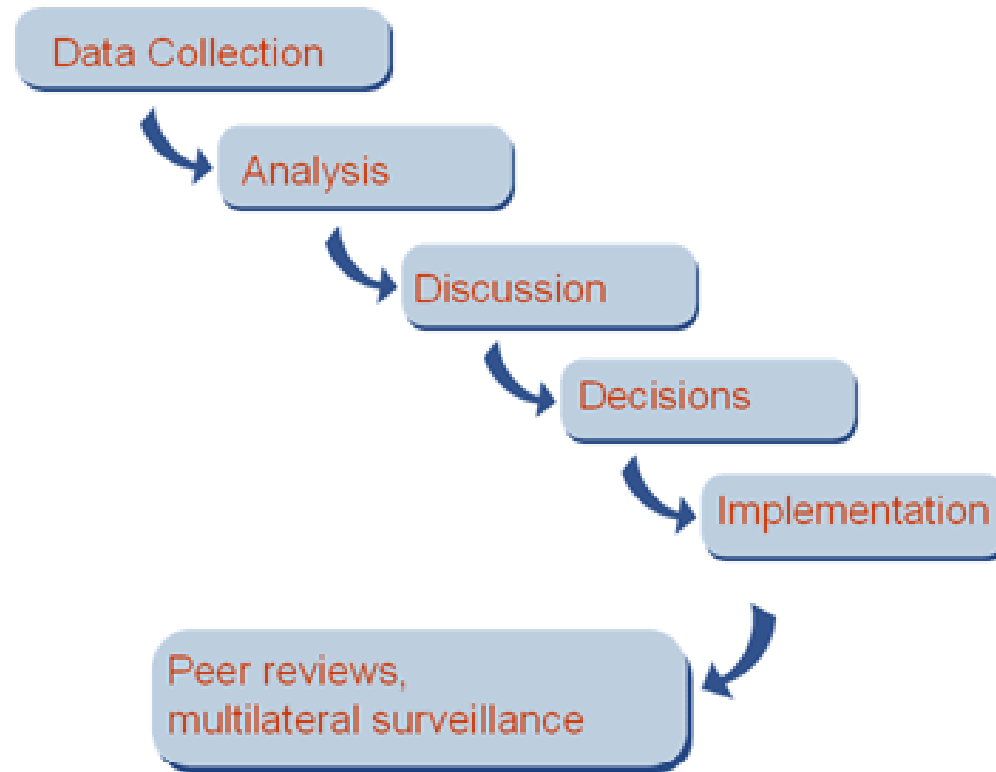

## **Secretariat**

Research, Analysis  
and Policy  
Recommendations

# Methodology

## OECD's way of working

# Peer review

---

- Examination of country policies and practices by **experts** from other countries
- Effective tool for policy **improvement** thanks to:
  - Peer **pressure**
  - Common methodology and **criteria** to assess performance for all countries
  - Systematic **monitoring** mechanism
  - Peer learning and **capacity building**

# Reliability of the OECD Data

---

- All of the OECD's data are submitted from the governments of OECD member and non-member countries.
- In order to make them internationally comparable, the OECD sets up the international standards for collecting statistics cooperating with the United Nations and Eurostat. (ex. Standard International Trade Classification (SITC), International Standard Industrial Classification of All Economic Activities (ISIC) )
- The governments collect statistical data in their own countries by such standards, and submit to the OECD.

# Challenges: Discoverability and Usability

---

- Create **publishing metadata** at more **granular** level so that smaller and more relevant pieces of information can easily be searched and **found**, whether data or analysis.
- Create **statistical metadata** so that the numbers are never delivered without the textual environment making them **understandable** and **usable**.
- Link, as much as possible, **analytical** content to the **statistical evidence** supporting it.
- Deliver the content in the most **user-friendly** environment (citation tools, links to the context of each object, multiple formats).
- Adapt content to the different platforms and reader environments.
- Increase content index coverage

# Country search

How Freemium  
could be a fairer and  
more sustainable  
version of OA**

## Most-read by STM publishers?

“Every successful brand in history is inherently unpopular with a specific demographic.”

“Somewhere along the way, people felt they had to be popular in order to be successful, when in fact, the opposite is true.”

“The brands playing in the space you want to dominate have already figured out the inherent power of being unpopular.”

(Published by Wiley)

# Do we know our audience . . . ?

“The audience which finds your content interesting and useful **is always larger** than you think.”

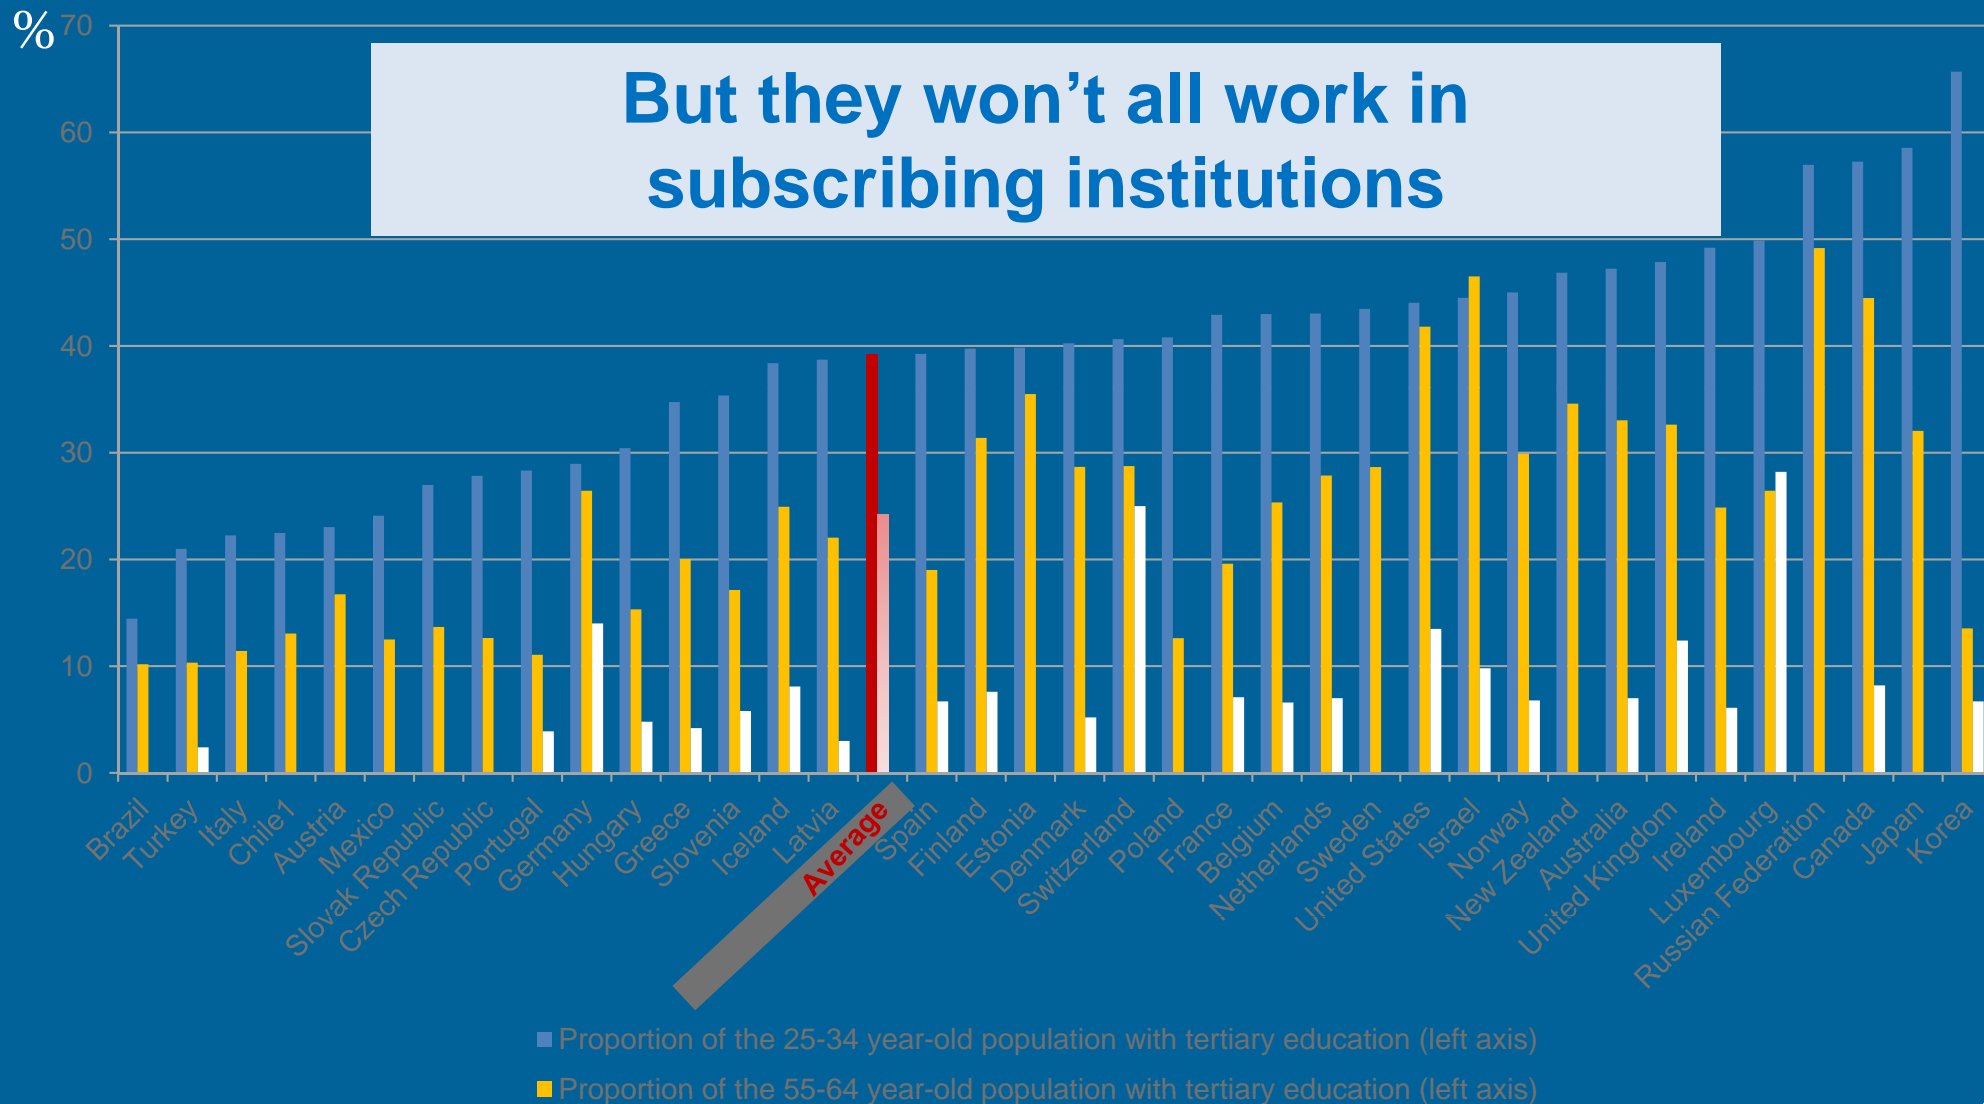

Practitioners, unaffiliated researchers,  
educated layman . . . .

# More graduates = more demand for scholarly publications

a

Source: OECD (2014), Graph A1.3. Percentage of younger and older tertiary-educated adults (2012): 25-34 and 55-64 year-olds, and percentage-point difference between these two groups, in *Education at a Glance 2014*, OECD Publishing. DOI: [10.1787/eag-2014-graph3-en](https://doi.org/10.1787/eag-2014-graph3-en)

. . . so, no wonder they're calling for better access . . .

No! You have to subscribe to knowledge!

ANGELO LOPEZ 2011

... and the policymakers and funders are listening ... and acting ...

What do you mean, these reports cost money? We paid for the @\*^%\$ research!

. . . so publishers are reacting . . .

*Don't worry, Dad, I'm going to turn this company around 360 degrees!*

... by turning their attention to authors  
(and their funders)

...at the risk of ignoring the needs of ...

# READERS

(and their institutions)

Practitioners, unaffiliated researchers,  
educated layman ...

Open Access – find the missing words

*“If you make it open . . . they will come”*

# Open Access business models summarised

## Green

- Please post a version in a repository
- Sometime later will do
- I hope a lot of readers will benefit (although I have now given them a horrible user journey and taken away their economic 'voice')
- I don't want to think about costs (or the impact it may have on journal or book publishing on which my reputation and career depends)
- But my conscience is clear

## Gold

- I'll foot the publishing bill
- I hope a lot of readers will benefit (although I have now taken away their economic 'voice')
- I don't want to think about future costs
- But my conscience is clear

And 20 years on from Budapest,  
<50% of journal articles and  
<5% of scholarly books  
are free to read.

**Will Green and Gold ever  
deliver 100% OA?**

# OECD Publishing's mandate

MAXIMISE  
DISSEMINATION  
(i.e. everything has to be free)

FULL  
COST RECOVERY  
(i.e. everything needs to be priced)

Accountable to  
our members on  
both mandates

So, how do we stay out of debtors' jail?

## Defining the econ

This chapter begins with the principles informing the "value of statistical life" method is available by w "value of statistical life" order to establish stan morbidity, it is possible to proceed with an indicative estimate of the additional cost imposed by morbidities drawn from the best available evidence.

... unfamiliar and non-routine (CUN) education. The solution cornerstone of any effective learning environment for mathematics for the 21st century. While students solving routine problems can rely on inference, solving CUN problems requires mathematical skills that include not just logic and deduction but also intuition, number sense and as in other domains. The approach to mathematical communication has also changed, with students in all age groups being encouraged to engage in mathematical discourse and share ideas and solutions as well as explaining their own thinking. Developing these competencies may result in enhancing social skills as well as mathematically literate citizens.

In conclusion –

## Is Freemium a better form of OA?

- **Freemium means actively building an audience**  
(You can be Free and not have readers)
- **Freemium keeps the audience in the driving seat**  
(You can be Free and ignore reader needs)
- **Freemium means innovation**  
(You can be Free and stop innovating)
- **Freemium delivers value for money**  
(You can be Free and build services that no one uses)
- **Freemium gives taxpayers/funders a choice**  
(To be Free taxpayers/funders must pay)
- **Freemium is compatible with Gold** – Funders can choose to make premium features free for everyone

# Go Freemium Open Access!
