

ScienceDirect

The leading platform of peer-reviewed scholarly literature

Presented by LIU Xiaoqian
x.liu.2@Elsevier.com

Elsevier 出版内容介绍

ScienceDirect 更新功能

如何获取图书馆可以访问的内容

E-PIC 的设置和使用

管理员账号的设置和**SD**用量数据获取

Elsevier启动了从“内容”到“内容 + 技术”的创新转换。Elsevier通过与中国科研机构的图书馆、规划办公室、研究人员以及其他相关人员的合作，我们可以为科研人员提供信息支持服务

ScienceDirect

A ScienceDirect subscription gives you and your patrons access to over:

15 million
publications

3,800
journals & serials,
representing more than
612,000 issues, Lancet
is the most published
journal on SD

20,000+
books including
reference works

Digital archives reaching
back as far as **1823**

“ScienceDirect offers an easy to operate platform that provides convenient access to a broad spectrum of interesting and useful research publications that I may have never considered exploring.”

*—Researcher/ Staff Member
Life Sciences, USA*

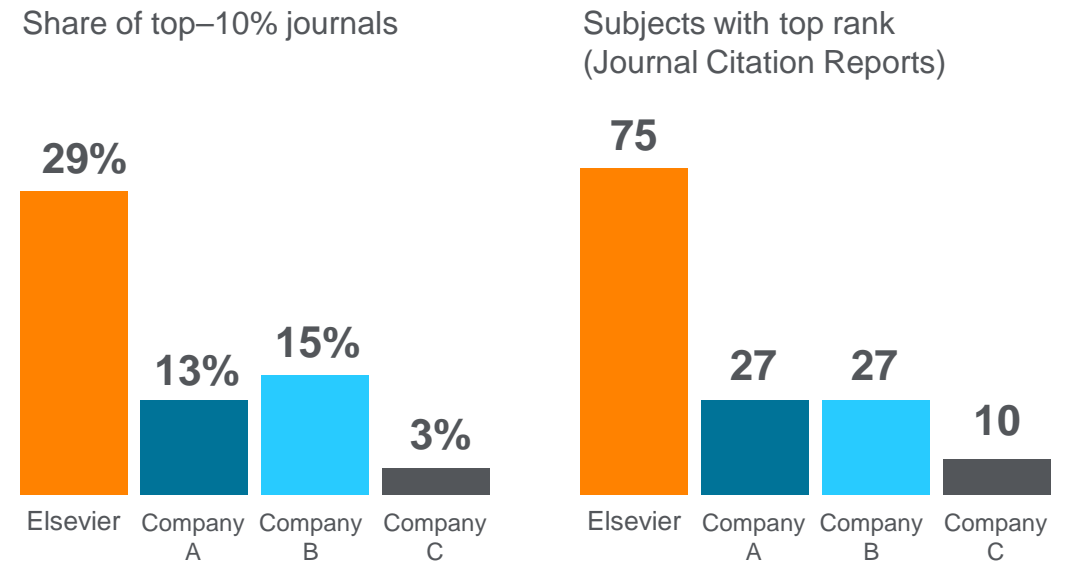

Our journals are ranking highly in every field

Journal ranking—Citescore

Journal ranking by CiteScore across 330 subjects per Scopus Metrics database; source: Scopus data (2016)

Journal ranking—Impact Factor

Journal ranking by Journal Impact Factor across 234 subjects per Clarivate's Journal Citation Reports database; source: Clarivate data (2016)

How do I use the new advanced search?

Last updated on 24/07/2018 01:46 PM

[▶ Performing an advanced search tutorial](#)

The new advanced search form offers an open design which allows you to specify one or more pieces of information (e.g., keywords, authors, dates, etc.) to find related documents in ScienceDirect. You can easily build an explicit query using multiple Boolean operators and nested clauses in your search.

None of the available fields are mandatory to an advanced search query. You are simply required to complete at least one field with searchable information.

How to search for other characters

Use Boolean operators to combine multiple terms:

- Boolean operators currently supported include AND, OR, NOT, and the hyphen (or minus symbol)
- Boolean operators must be entered in all uppercase
- The hyphen (or minus symbol) is interpreted as the NOT operator

For example: `black -hole` will return results containing 'black', but exclude any instances where 'hole' appears with it.

- Boolean precedence is as follows:
 1. NOT
 2. AND
 3. OR
- Parentheses can be used when nesting clauses so the grouping is clear

For example: For `a OR b AND c`, enter `(a OR b) AND c`

Alternatively, enter `a OR b) c`

- Quotation marks can be used to specify terms which must appear next to each other

For example: `("heart attack" OR "myocardial infarction") AND diabetes`

ported. A search for *colour* returns

atches documents containing the
omega) and ω (lowercase omega).

the same line as the other
O," enter H2O.

Potential efficiency gains from recommended articles

By using article recommender in the last 12 months, Tsinghua University may have saved:

8,130,870 seconds

That is approximately 282 working days

ⓘ How we get the information

Last updated on 19 March 2018

We have estimated time gained by comparing the time taken to reach the article via the recommender with the time taken to find a similarly relevant publication through search. Testing shows that the article recommender saves users on average 110 seconds per view.
